SAUCER MAGNOLIA

(Soulangeana)

Most favored magnolia for northern gardens. Huge tulip-like flowers, 6 to 9 inches across, adorn the tree in early spring before leaves appear. Flowers are white within, stained purplish-orchid without. Broad, glossy leaves lend tropical effect. When in bloom, even one plant will dominate the garden—even the neighborhood.

2-3 ft.

Northern SWEET GUM

(Liquidambar styraciflua Illinois)

Our most handsome tree. Rapid in growth and not fussy as to planting location. Star-shaped leaves are unlike any other tree and no tree displays such a riot of autumnal colors. Growth columnar and stately yet branches spread enough to provide abundant shade. This is vital—our trees are grown from hardy Illinois parent stock—far superior and more reliable than the usual southern stock.

Rushed From Famous Japanese Gardens
Especially for You—

THE EXOTIC TREE PEONY

(Paeonia moutan)

A garden treasure so rare it is found in only a few outstanding American gardens. Yet the lovely Tree Peony is completely hardy and does well in most sunny locations with a minimum of care. Once established, the Tree Peony lives to an ancient age, increasing in size and abundance of bloom year by year. And what flowers! Big, double blooms up to 8" across. Older plants bear as many as 200 blooms per plant. Petals have the gleam of oriental silk and a clarity unrivaled in lesser peonies. Delightfully perfumed.

Plants gradually grow to fine bushes 3 to 4 ft. high and broad, as they do not die down to the ground each winter as ordinary peonies. Do not cut back woody branches.

Tree Peonies have been acclaimed the most beautiful plants ever to bloom in a garden. They certainly deserve an honored spot in your garden where they may develop into their full glory. Plant singly or in groups of three.

You get 2-year field-grown grafts of finest imported quality

ROSE GARDEN FAVORITES

The Best Rose Bushes You Can Buy

Compare with any other source and you'll agree that our rose bushes out-perform most and are not exceeded by any. We are proud of our roses—the finest two-year nursery-grown plants that can be grown. We offer no southern-grown or waxed-topped bushes.

All of PLANTLAND'S roses are guaranteed to come into full bloom promptly this summer (except hardy climbers, which usually do not bloom until second year). You will like the way our sturdy bushes take right off and quickly produce large and abundant blooms—week after week through the summer and up until killing frost next autumn. You will appreciate the inherent hardiness of these bushes that gives best assurance of new blooming splendor year after year. You will know why fine rose bushes can be the glory of your garden.

If you have never planted a rose bush before, or if you are an old rose hand, you will find our simple planting and cultural guide helpful in making your rose garden a neighborhood show-piece.

VARIETIES—Our variety selection is one of the most complete you will find. Yet we have culled vigorously to bring you only the best from each class of roses. If it's really outstanding, you will find it in this variety list.

Hardy Everblooming ROSE Bushes

OUR GREATEST ROSE OFFER EVER

Fine, fat, fresh two-year Nursery Grown rose bushes ready to pop in full bloom this spring and bloom abundantly through summer and fall!

Make no mistake—these are hardy, husky rose bushes field-grown under irrigation. The varieties included are at the top of rating list of the American Rose Society—the final arbiter on rose quality. These are all-time favorites to give you the most magnificent bloom, delicious fragrance and vibrant color week after week throughout late spring, summer and autumn. Sorry, no substitutions. Remember, these are no Texas wax-topped plants, prepackaged at some distant point and shipped in. We carefully sort, grade and pack right in our own packing room to assure field-fresh quality.

SPECIAL SALE

With this rose offer—

FREE: Drive-in customers will receive with this rose package one 1-pound carton of FERTI-LOME ROSE FOOD. This is the complete organic rose diet containing all trace elements, plus balanced amounts of nitrogen, potash and superphosphate. This is the food we recommend for maximum blooming.

Mail Order customers—Because of shipping weight we cannot send rose food, but will include as free gift with this rose package one White Flowering Dogwood Tree.

3 for only \$1.79

Catalog No. R 100

We cannot guarantee the length of time our stocks of these roses will last at this truly terrific offer. We can assure our early mail order customers that they will be protected. When we peek in our bulging storage rooms we think we will have enough plants for our drive-in friends for the first few spring weeks. But when our stocks are gone, they are gone! We cannot replace to sell at this price!

MINIATURE ROSES

For your growing pleasure indoors and outdoors—a dainty miniature rose bush no taller than 12 inches. Enchanting, long pointed buds open into tiny perfectly-formed double roses. Delightful for arrangements and nosegays—bright beauty for bed edgings, mass plantings or single potted plant. Easy to grow as Hybrid Teas, prefer good rich soil on the slightly acid side. Feed and spray occasionally. Miniature Roses are gay gifts for shut-ins, pleasure for apartment dwellers and joy for a child's first venture with flowers.

Grown in pots, shipped with pot balls individually wrapped.

EVERGREENS

at Anniversary
Sale Prices

Dwarf Spreading Yew

(Taxus cuspidata nana)

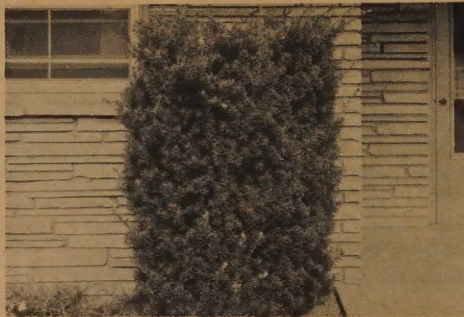

Despite its name, a good vigorous grower and much superior to the old spreading yew. It retains its compact shape and does not grow out-of-bounds. More dwarf and spreading than our Densiformis Yew.

Catalog No. E 23

Bushy 12-in. plants

\$200
ea.

2 for \$3.85 3 for \$5.50 5 for \$9.00

BERRYBUSH YEW

An outstanding upright-growing hybrid yew. Similar to Hick's Yew but fuller and stronger in growth. Grows naturally as a broad columnar type. Use at corner, doorstep or wherever height is desired. Excellent for hedging. Added attraction is abundance of bright red berries in fall.

Catalog No. E 12

Bushy 12-in. plants

\$200
ea.

2 for \$3.85 3 for \$5.50 5 for \$9.00

Plantland's DENSIFORMIS YEW

Our own strain of Densiformis Yew (Taxus densiformis, which means "dense formed"). A superb hybrid between the English and Japanese Yews. This yew has proven incomparably superior to all other types for the St. Louis area and other harsh mid-continent regions. Reports from across the country prove it to be equally outstanding in other areas.

It grows rapidly (most yews are slow in growth) yet retains its dense, compact, spreading habit. It tolerates heat and drought better than any yew in more than a decade of testing and has come through the worst of winters with flying colors.

You don't have to fuss about exposure when you plant this yew. It reveals in full sun—on any side of the house—but will stand considerable shade. (Like any yew, it likes a well-drained soil. Use it proudly in your foundation planting; for planter boxes; at the entrance; and, especially, for the choicest evergreen hedge you can plant. It is a rugged beauty and you don't need a green thumb to make it grow.

DID YOU KNOW?

That hybrid vigor is commonly manifested in trees—as well as in corn, animals and man. Hybrid yews are generally much superior in performance to either the Japanese or English parents. Similar hybrid vigor is observed in elms and a host of other plants.

That most evergreens (Conifers) make all their growth in one spurt; then stop for the entire year? Pines, spruces, firs have this habit, and this is your cue to proper pruning. When the "candle" (with pines) or new shoot is extended—usually in May—you can shape up with a single trimming as there will be no more top growth for the year.

Yews, Junipers, Arborvitae, Hemlocks, Cedars make recurring growth through the season, but one trimming before growth starts in the spring usually suffices to keep the plant shaped up and within bounds.

That roots, unlike tops of plants, do not go dormant? Roots may grow any time soil temperature is between 32 and 120 degrees, although most vigorous growth occurs at a middle range. That's one big benefit of a mulch—keeping soil tempered for good root growth.

Black Hill's SPRUCE

A dense - growing, compact, somewhat dwarfish spruce with needles bluish-green in cast. Of cast-iron hardness but will also take the torrid Missouri summers.

Catalog No. E 34

Plantland's Select Shade and Lawn Trees

SILVER AND GREEN POPLAR (Bellesonne)

An unrivaled columnar tree for screening or accent. Reaches a height of 40 to 50 feet and in a hurry. Trees on our own nursery have shot to 30 feet in four growing seasons. Best of all this tree does not "playout" like the Lombardy Poplar. It is far superior in every respect—character, form, beauty and long life. Silver and Green has foliage that is bright green above; silver beneath. Smooth, silver-green bark is most attractive winter and summer. Tree forms a narrow shaft of shimmering foliage no more than 5 feet wide when the tree is 25 feet tall. For full windbreak or screen, plant in a row 3 feet apart.

4 to 5 ft. **\$175** Each 3 for **\$450** 5 for **\$725**
Catalog No. T 17 10 for **\$1400** 20 for **\$2500**

★ HYBRID ELM

(cross between *Ulmus pumila* and *U. fulva*)
Fastest Growing Tree in Temperate Zone

Grows like fury and provides abundant shade in a hurry. Tough and durable and withstands ice and storms. Highly resistant if not immune to the diseases that have plagued the American Elm. Trees on our grounds tower to 20 ft. in only 2 seasons! Casts abundant shade, but grass grows better beneath its spread than in the open. Where you want results in a hurry at modest cost, you can't beat this tree.

4-5 ft. trees
Catalog No. T-4

—bundle of 5 trees— **\$750**

America's Newest Shade Tree Sensational CORK TREE (*Phellodendron amurense*)

America's newest hardy Shade Tree. Wide spreading branches and deeply furrowed cork-like bark, white flowers and huge bunches of black berries make it an outstanding shade tree. Grows with great rapidity and wide spreading habit, provides shade in a hurry.

5-6 ft. field-grown trees **\$325** ea.
Catalog No. T 2 2 for \$6.00 3 for \$9.50

CLUMP WHITE BIRCH

Multi-stemmed form of the beautiful Paperback (or Canoe) Birch. Grows rapidly and outer bark soon exfoliates to reveal snowy-white under-bark. Provides all-year beauty. Choice for naturalizing or informal effect.

3-4 ft. field-grown clumps **\$375** ea.
Catalog No. T 23 2 for \$7.40 3 for \$11.00

PIN OAK

Most favored of all the Oaks. Rivals Sweet Gum as a popular lawn and street tree. Stately, pyramidal form. Dense, horizontal branching. Fine-textured foliage turns scarlet in autumn. Unlike most oaks, it is a fairly rapid grower.

5-6 ft. field grown **\$500** ea.
Catalog No. T 15 2 for \$9.75 3 for \$14.25

Golden WEEPING WILLOW (Niobe)

The loveliest of all the weeping willows with its bright golden bark winter and summer and shimmering branch streamers cascading to the ground. Foliage a bright sparkling green above, silver beneath. Lends an enchanting, cooling effect as branchlets stir in breeze.

We have found in our own plantings that the light "whips" we offer this spring actually transplant better and rapidly overtake and surpass larger trees. You should stake these whips to encourage an upright growth.

3-4 ft. whips **\$100** ea. 3 for \$2.00
Catalog No. T 21

SPECIMEN TREES

Drive to the nursery and inspect our "tree orchards." Here you can select specimens up to tree-mover size for immediate shade and landscape effect. Here you will find not only the popular varieties but the unusual and distinctive types as well. We have the most modern equipment for handling trees of any size.

Plantland's Quick-Shade LOCUST

A strong, durable tree of rapid growth casting a light, lacy pleasant shade pattern.

5-6 ft. trees **\$395** ea.
Catalog No. T 10 2 for \$7.50 3 for \$10.75 5 for \$17.50

EMPRESS TREE (*Royal Paulownia*)

Plantland's **COLORFUL** HEDGES

Ever-Blooming **CRIMSON KING** Rose Hedge (*Rosa rugosa*)

For those who want a sturdy living fence with virtually year 'round color this variety is unexcelled. Large semi-double flowers 2 1/2 inches in diameter of bright crimson to Persian-rose appear in late May and bloom continuously the whole summer. Flowers are followed by huge brick-red fruits 1 inch in diameter, gay as Christmas ornaments, that remain on the shrub until late winter.

The foliage, too, is as colorful as the flowers and fruit. It is a very dark, shining green that turns a brilliant orange in autumn. Stems are densely beset with bristles which discourage trespass and provide protection but are short enough not to injure children brushing against the hedge. Makes a truly living fence. Requires no upkeep—mends itself and never needs painting.

CRIMSON KING is a fast-growing, vigorous shrub rose, but one that never grows out of bounds. It is early blooming. Flowers appear on one year plants in our nursery which is remarkable for a shrub rose. You can expect bloom even the first year. The second year you have a riot of color.

CRIMSON KING is the hardiest of roses. It is known to endure the coldest temperatures to be found anywhere in the U.S. (It is far harder than Multiflora or any other fence roses commonly offered). Likewise it thrives in the hottest summers and under the most trying conditions.

It is one of the few plants that will tolerate even salt spray at the seashore! It is not subject to the multitude of pests and diseases that affect most garden roses; plants in our nursery are bright and vigorous without any spraying whatsoever. It grows and blooms best in the open in full sun and should not be planted in dense shade.

Horticultural authorities describe it as one of the handsomest of shrub roses and praise it for year-round beauty.

CRIMSON KING grows naturally to only 6 ft. without any support whatsoever. It is particularly lovely as a free-growing hedge, but it may be clipped to any dimension desired, as clipping only makes the growth thicker.

There have been several types of "red" rose hedges offered recently. It is our belief that for year 'round beauty, hardiness, vigor and fencing purpose, none can match our **CRIMSON KING**. This is the first year we have been able to produce even a modest quantity of this exceptional plant. Order today while our limited supply is available.

For a quick-knitting fence, set plants one foot apart in a single row. Even a spacing of 18 in. will provide a hedge by the second growing season.

SUB ZERO LILAC SCREEN

This is a type of old-fashioned Lilac (*Syringa vulgaris*) from the high hills of Austria. Heavy trusses of fragrant lilac-flowers in May. Very vigorous and hardy. Will endure temperatures to 20° to 30° below zero and will prove hardy anywhere in the country.

Foliage rich dark green, dense and leathery. Use as a screen background, living fence or property divider. Lilacs do best in full sun. They relish lime and respond to fertility. Plant a foot apart in a single row for quick forming hedge or screen. Stocky 2-yr. plants, 12-18 in. Catalog No. H11

RED LEAF BARBERRY

(*Berberis thunbergii atropurpurea*)

Great improvement over the older green Japanese Barberry. Blood-red leaves provide rich color to home grounds from spring until fall and the red berries remain to provide winter color. One of the most serviceable low hedge plants. Requires little if any trimming and grows in most any soil. Noted for ability to withstand dry conditions. Plant in full sun one foot apart for a tight hedge.

The Finest Jewel-Tone Floribunda Cushion Mums

Those who saw our acres of chrysanthemum fields last fall agree that our Jewel Tone Floribunda Mums were the finest they had seen. Of hundreds of varieties available we have sorted out only the finest types. All develop into great, compact masses of bloom. THIS VERY FALL—never grow tall or scraggly. These are the long-blooming types that are so hardy they laugh at early frosts! Last fall ours were bright and gay in mid-November after a 23° freeze! You'll agree they couldn't possibly pack more bloom and that the jewel colors are the most vivid you have seen. Plant plenty for a fiesta of color this fall.

Catalog No. P 135P

New early flowering Garden Mums most ideal for growing to giant size. This is the most spectacular development in Chrysanthemums for years. Never before has it been possible to have in your own garden the same big greenhouse-type mums that florists sell at premium prices.

And these sub-zero strains are completely winter hardy. Guaranteed to bloom first season. What's more they'll produce gorgeous blooms year after year. These corsage-size beauties measure up to 5" and 6" across. You'll find them robust, thriving with minimum care. Plants grow to 2 to 2 1/2 feet tall and produce bushels of blooms. For really giant-size Mums, remove all except strongest bud on each stem.

You will enjoy weeks of floral beauty from late summer till heavy frosts—gorgeous blooms for corsages, cut flowers and plants left over for continuous garden beauty.

Here are the most glamorous selections of these giant exhibition-types:

- P 13A SHALIMAR—cream white
- P 13B SPINDRIFT—snow white
- P 13C OLD LAVENDER—pure lavender
- P 13D STYLISH—raspberry-cerise

Colorful Hedging and Screening for Outdoor Living

Plantland's PARVIFOLIA (Ulmus parvifolia) SCREEN

Catalog No. H 6
Dense Twigg 12-in. plants

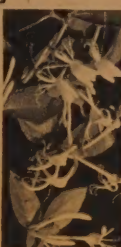

10 plants (20 ft. of hedge)	\$2.50
50 plants (100 ft. of hedge)	\$11.50
25 plants (50 ft. of hedge)	\$6.00

Rare, rapid-forming and handsome! For some years tree experts have recognized Parvifolia as an exceptionally fine tree but it has been so scarce as to be virtually unobtainable. We first became acquainted with the merits of Parvifolia from some handsome specimens of the Missouri Botanical Gardens. With some effort we succeeded in propagating the plant and after growing it in our nursery we discovered its amazing merits as a screening plant. Parvifolia grows very dense and twiggy—yet with great rapidity. It branches right down to the ground and plants a year after planting resemble boxwood of 10 years growth! Parvifolia means "Tiny Leaved." The small leaves are very dense and almost as dark green as a yew tree. Furthermore, they remain on the plant LONG IN THE FALL when other shrubs are bare and bare. We have not found Parvifolia to be attacked by any disease or pest. It is exceptionally clean and litter-free. It tolerates some shade, it thrives best in the open. Parvifolia may be clipped to form a low hedge but it is in its full glory as a living screen of 5 or 6 feet. Its light twigs are easily sheared and the screen can be maintained at any desired dimension. Parvifolia is so rare we know of no other nursery in the country that has an appreciable supply of plants. Ours is none too abundant. If you want a luxurious screen for privacy about your home grounds order enough plants now. Plant 2 ft. apart.

Gain Low-Cost Privacy and Protection With Lovely

FRAGRANT HONEYSUCKLE SCREEN (Lonicera fragrantissima)

Now your home grounds can be screened from dust, noise, traffic, objectionable views and trespass with this living fence of sturdy, vigorous Fragrant Honeysuckle at amazingly low cost. Referred to as "Winter Honeysuckle" because thick, leathery, half-evergreen leaves remain bright and cheery most of the winter when other

shrubs are bare. Delightfully fragrant flower in early spring. Completely hardy and disease free. Never needs spraying. Thrives in sun or shade. A bushy plant from the ground up. Does not become "leggy." A perfect nesting haven for song birds that relish the bright red berries. Set plants two feet apart in a single row for hedge effect next summer. Catalog No. H 17

FLOWER BASKET SHRUB BORDER

Catalog No. H 15

Bundle of 35 plants
(enough for 50-ft. row)

\$5.00

Here is a hedge and screen that will provide a cascade of color early spring till late fall and year 'round privacy

and protection. It will also prove a nesting haven and cupboard for song birds. Flowers first appear at break of spring when the Shrub 'Cherries burst into a pink-tinted snowy bloom. These are quickly followed by the rosy-purple bloom of Dwarf Redbud and then the fragrant, silvery-gold flowers of Cherry Eleagnus. Lilacs appear next, and these in turn are rivaled in fragrance by the Sweet Mock Orange blossoms in June. In late June and early July the sparkling red fruits of the Shrub Cherry provide a tasty tid-bit for children (if the song birds do not get them first), followed closely by the equally brilliant and tasty berries of Cherry Eleagnus. In August and September the Hibiscus (Shrub Althea) dominates the border with its huge single and double flower trumpets of white, pink, blues, violet to metallic-purple berries strung like star sapphires along each branchlet, makes a foil for the higher-ranging Strawberry-bush (Euonymus bungeana), whose branches become heavily laden with dazzling fruits more like pink-capsuled bittersweet than strawberries.

Included in each planting bundle is a balanced assortment of these eight shrubs. Set plants 18 in. apart in a single row, or you may arrange a staggered planting to allow more growing space. You get young thrifty plants 12 to 20 in. in height that will begin blooming and fruiting the first year after planting.

EVERGREEN WALL OF GREEN

May be confined to a low hedge 15 inches tall or allowed to grow into a tall screen to 15 feet! The U.S. Plant Center adjoining us has hedges and screens of this same wonderful plant from 3 feet to 20 feet in height, all the same age. Hardy, fast growing, durable. Evergreen foliage emerald green in summer, rich forest green with bronze in winter. Prefers full sun.

Catalog No. H-14

Plant 1 ft. apart in single row. You get 8-12 in. transplants that grow with great vigor.

Forrest Keeling Quality

Lifetime MULTIFLORA ROSE "LIVING FENCE"

FORREST KEELING MULTIFLORA ROSE

—THE BEST—FOR A LIFETIME LIVING FENCE

THE BEST LIVING FENCE you can buy! That's right, grade for grade you will find our Multiflora definitely superior. Grown by Hugh Steavenson, the originator of Multiflora Rose Living Fence.

Our plants are grown on the best Mississippi bottom ground. Plants receive the best culture, including a feeding of balanced plant-food injected into irrigation water each time plants are irrigated. The result is a "fattened" plant, loaded with nutrients, that is "rarin' to grow." Folks are amazed at the growth of our plants the very first year! Ordinarily, plants "stand still" the first year while the root system becomes established. And the fact that we grow and ship more of our living fence plants to more people throughout more of the country than any other nursery means we have been able to hold our prices to rock-bottom minimum for quality stock.

FORREST KEELING MULTIFLORA ROSE is a thick thorny, prolific blossoming strain that is especially noted for its abundance of bright red berries which appear in early fall and remain throughout the winter months. We grow only one type of Multiflora and we think there is none better for screening and fencing purposes. Its growth is umbrella-like. Canes shoot up 4-6 ft. then begin to droop with the slender ends of the canes hanging almost to the ground. When plants are set close together (12 inches) in a single row they rapidly form an effective barrier against animals and people.

The importance of selecting the right type of Multiflora cannot be over-emphasized. The U.S. Department of Agriculture says "When selecting plants for your fence hedge of multiflora rose, be sure they are erect and have stiff thorns." The University of Missouri, College of Agriculture, has this to say: "The multiflora rose is notorious for variability of form and vigor. Upright, spreading and trailing kinds may be found. Some have thorns, others are thornless. For hedge purposes, it is important to select the upright, thorny, vigorous type which grows a mass of dense canes from the ground to a height and spread of about eight feet.

DID YOU KNOW?

That peat moss is still the best medium for lightening and improving planting beds—"the more the better". Experts who have had all the various chemicals and synthetic materials still prefer peat. Azaleas, Rhododendrons and the like thrive best in a raised bed of almost pure peat. Generous applications are beneficial for almost all plantings. That the Vitamin C (ascorbic acid) content of Rosa rugosa (Crimson King ROSE HEDGE) fruits is 100 times as great as that of lemons, oranges, grapefruits, strawberries and other Vitamin C fruits. The Acerola or Barbados Cherry is second to Rugosa Rose with about 50 times the Vitamin C content of oranges. A single Rugosa Rose "hip" or a single Barbados Cherry will supply the daily requirement of an adult.

"Clematis" comes from the Greek meaning "climbing plant." When these velvety, large-flowered types burst into bloom they are surely unrivaled by any other climber. Stunning on trellises, lattice work, walls.

Catalog No. V 5 **CLEMATIS JACKMANI** — the perennial favorite among all Clematis. Huge violet-purple flowers 5 to 7" across of a beautiful color not seen in any other vine smother the plant from mid-July on.

Catalog No. V 5A **RED CLEMATIS** (Edward Markham) — similar to Jackmani but flowers a rich, red velvet.

Catalog No. V 5B **CANDIDA** — most showy of the white Clematis. Flowers rival Jackmani in size and texture but are snowy white.

PASSION FLOWER

Most exotic of all flowering vines. Perennial vine with delicately fragrant flowers suggesting the crucifixion. Flowers are multicolored with white and purple crown dominant. Once established produces new flowers daily, July to frost and spicy fruits suitable for marmalade. Normally grows 12 to 15 ft. and blooms first year. Hardy enough to stand northern winters with some protection.

Catalog No. V 12

VINCA MINOR (Periwinkle)

An outstanding ground cover for the spot that is too shady for grass or other plants to grow. One of the very best ground covers. The glossy foliage remains green summer and winter. In early summer the solid mass of glossy green leaves are dotted with a profusion of bright blue flowers. Excellent for edging on borders. For ground cover plant 12" apart each way.

Additional Vines and Ground Covers

Purple Wintercreeper

(Euonymus colorata)

A splendid evergreen ground cover and vine. Rich, deep green in summer; copper-red foliage in winter. Vigorous growing in both shade and sun. Catalog No. V 10

Chinese Bittersweet

More fruitful and colorful than native bittersweet. Splendid for covering a fence or bank. Grows in hottest, driest situations. Adjacent to our grounds, there is a mile of fence planted to this vine and it is a riot of color in autumn. Catalog No. V 4

Hall's Honeysuckle

Used extensively by highway departments for bank covering and equally useful for covering any slope, either sunny or shady, that is too steep to mow. Evergreen foliage. Fragrant, trumpet-shaped flowers. Chinese name means "gold and silver flower." Catalog No. V 7

100 for \$25.00

Engelman's Scarlet Ivy

Our fastest-growing ivy. As a wall vine, plants will reach eave in a single season. Equally useful as a ground or rock cover. Autumn foliage is a brilliant scarlet. Catalog No. V 13

Baltic Ivy

(Hedra helix baltica)

Hardy form of English Ivy. Excellent vine for covering walls of stone and brick. Equally useful as a ground cover where grass is shaded out or for shaded embankments. Spreads and covers rapidly. Plant one foot apart. Catalog No. V 1

(For ground cover listed vines may be spaced 1 to 2 ft. apart each way. Bulgarian Ivy is best spaced 12 to 15 inches apart; Purple Wintercreeper 15 inches; the other vines may be spaced on 2 foot centers.)

DID YOU KNOW?

That most folks set plants too deeply, thereby causing poor growth and sometimes loss of the plant. Set no deeper than plant grew in nursery. Expert gardeners have had excellent success with dogwood (often touchy to transplant) by planting shallow and mulching over any exposed roots.

SILVER LACE VINE

A very fast-growing vine. Grows 15 to 20 feet the first year after planting. In a warm, sunny exposure it will be covered from bottom to top with sprays of snow-white flowers. Clings to any type support. Ideal for covering unsightly fences or buildings.

HOLLIES

AMERICAN HOLLY

OLD HEAVY BERRY

Acclaimed best of all the American Holly (*Ilex opaca*) types. Old Heavy Berry is a northern selection, rugged and durable, with fine dark green, glossy foliage. And how it berries! Large, bright red berries borne in profusion, even when plant is quite small. Parent plants in the nursery have withstood temperatures to 15° below zero. This is the hardest of all broadleaf evergreen trees and its 4-season beauty is unrivaled in northern climates. In a few years you may prune heavily for Christmas wreaths and decorations.

ABELIA GRANDIFLORA

(Glossy Abelia)

An exquisite broadleaf evergreen that is simply charming month after month. Abelia begins to show its dainty shell-pink bloom at break of summer and simply doesn't stop blooming until frost. Our plants grow to about 3 feet which makes them superb for low-line massing, entrance pieces or choice hedging.

Catalog No. BE 1

\$1.29 ea.

3 for \$3.55

MAGNOLIA GRANDIFLORA

The most spectacular broadleaf evergreen tree in America. Large, leathery evergreen leaves. Huge, waxy, velvety-white flowers as much as 10 inches across appear in early summer and bloom intermittently through the summer. Flowers fill the garden with fragrance.

In the South, this tree reaches majestic proportions but grows to about 30 feet in St. Louis. A protected location is definitely suggested, but we have a specimen at our office entrance, rather exposed, that has withstood wintry gales and temperatures of 15° below zero. Our plants are propagated from northern stock.

TROPICALS and Less Hardy Plants

From the broad tropical and southern temperate zones of the world come many glamorous and choice plant beauties that will thrive in our northern summers and over-winter indoors. Some, with extra protection, may remain outside. Note that minimum temperature for each plant is indicated. Here are some of the more exciting for your garden and interior decor.

Chinese HIBISCUS

These gorgeous tropical hibiscus succumb to the first fall freeze (unless taken indoors) but what a ravishing display of color you get all summer and autumn! There are hardy hibiscus but they simply won't hold a candle to these tropical queens. Here are some of the very best—

Catalog No. NH 6A **Crown of Bohemia**—very full double petals of magnificent golden yellow with deep orange-red throat. Rich green foliage.

Catalog No. NH 6B **Kona**—Hawaiian pink in very full double ruffled petals with faint pink-beige border. A summer dazzler.

Catalog No. NH 6C **President**—One of the most satisfactory Hibiscus created. Large single flowers—dramatic in size and rich, intense red coloring. Vigorous, compact foliage.

Catalog No. NH 6D **Red Dragon**—very colorful double red flowers produced in profusion during warm months. Intense deep glossy green foliage.

Catalog No. NH 6E **Sundown**—large double orange colored flowers tinted nasturtium red and deep glossy foliage.

Catalog No. NH 6F **White Wings**—large single white petals with ruby eye.

1 Dwarf Lemon Plant and **\$2.75**
1 Dwarf Orange Plant

Hardy CORSAGE GARDENIA

Here is a lovely evergreen plant that will actually take temperatures approaching zero. Ours have thrived in an unheated plastic-covered house where winter temperatures regularly dipped to 10°. In Tennessee I have seen this plant peaking through drifts of snow, unblemished. Thrives wonderfully planted out-doors through summer and autumn; then pot and grow in a cool, sunny corner indoors where you can pluck fragrant, waxy corsage blooms through winter. Blooms best around Easter and up to Mother's Day.

Catalog No. NH 1
3 for \$2.25

79c ea.

Hardy Tree Philodendron "JUNGLE GARDENS" (self-seed)

This amazing Philodendron, a self-heading or "tree" type, has actually withstood out-door November temperatures as low as 17° at PLANTLAND without a blemish (but don't risk it any lower)! Leaves are a dark green, pendant, with a lustrous polish, often grow to 2 feet long. Leaves start without lobes and gradually become more cut-leaf as they expand. Plant out-doors after cold weather in a semi-shady spot to create a lush tropical setting. Pot and bring indoors over winter. You'll soon have a priceless specimen.

Catalog No. NH 5 **\$1.00**
3 for \$2.75 **ea.**

GOLD DUST PLANT (Aucuba)

Small compact evergreen shrub with large glossy green leaves splashed with gold. Produces bright red berries. Shade loving. Thrives indoors but will take out-door temperatures to zero, so you may leave out-doors in protected corner with some top protection.

Catalog No. NH 7 **\$1.00** ea.
Pot Plants
3 for \$2.75

ORCHID TREE (Bauhinia)

One of the showiest small trees, the umbrella-like crown bearing 2-inch, pink orchid-like flowers in spring. Very colorful. This plant will withstand but few degrees of freezing so must be carried over winter as an indoor plant.

Catalog No. NH 8 **\$1.00** ea.
Pot plants
3 for \$2.75

PINK POWDER PUFF (Calliandra)

Desirable tropical evergreen shrub for unusual accent. Profusion of bright pink stamens, shaped like huge powder puffs, contrast with graceful feathery foliage. Very colorful. Likes full sun. Protect against hard freezing. 15 above.

Catalog No. NH 10 **\$1.25** ea.
3 for \$3.50

Carrissa Grandiflora "Fancy" (Natal Plum)

Top-notch shrub with white, waxy, fragrant flowers. Leaves deep green, glossy. Delicious red plum-like fruits. Carry over-winter indoors as a pot plant. 25° above.

Catalog No. NH 11 **\$1.25** ea.
3 for \$3.50

Dwarf BOTTLE-BRUSH

Large red flower heads shaped like bottle-brushes, boldly displayed, protrude from colorful red-tinted green foliage. Drought resistant and likes full sun. This is the hardiest of the bottle-brushes and will take zero. Plant in protected corner and give extra protection where sub-zero temperatures occur.

Catalog No. NH 13 **\$1.00** ea.
Pot plants
3 for \$2.85

Angel Wing Jasmine (magnificum)

Large, glistening, fragrant, white windmill-like flowers against glossy green foliage. Semi-vine evergreen that will be something entirely new and lovely for your home decor. 28° above.

Catalog No. NH 14 **\$1.00** ea.
3 for \$2.75

Additional Exciting

TROPICAL and SEMI-HARDY PLANTS

Catalog No. NH 15 ACEROLA—The Vitamin C Plant

You have read about this wonderful new plant, called Barbados Cherry. The scarlet red berries, tart and tasty, contain 50 times as much vitamin C as oranges. Grows as shrub with glossy foliage and bright pink flowers. Hardy to only 25° so must be carried over-winter indoors.

Catalog No. NH 12 WEEPING FIG (Ficus benjamina)

A new Ficus with rich green foliage and pleasing weeping habit. A delightful foliage plant that lends a grace and charm not associated with stiff, upright growers. Splendid with other plants in the indoor planter and grows splendidly in semi-shade outdoors during summer months. 25° above.

Catalog No. NH 16 ABYSSINIAN BANANA

An excellent ornamental banana, ideal for tropical settings. Large green leaves have red mid-rib. You will be amazed how this plant will shoot up in your garden this very summer (but don't expect any bananas!). Hardy to only 28°.

Catalog No. NH 17 CHINESE PISTACHIO

This is a rapid-growing shade tree in California greatly cherished for ornamental plantings because of its lovely pinnate foliage which turns intense crimson in autumn. Recognized as hardy to 5° or 10° but Washington, D.C., trees have survived and thrived following dips to 10 below. Worth testing in a protected corner of your garden.

Catalog No. NH 18 Japanese PODOCARPUS (macrophylla)

One of the most elegant of evergreens. Lustrous, dark green needle foliage resembles a shaggy, robust yew tree. Makes a beautiful tub plant and one seen in the most discriminating settings. Though called "Indoor Pine Tree" it is hardy to 18°; so it may be left outdoors till quite cold weather.

Catalog No. NH 19 Dwarf Carnation-flowered POMEGRANATE

Those who have thrilled to the sparkling red flowers and colorful fruits of the Pomegranate, so famous in song and story, will be truly captivated by this dwarf carnation-flowered form. Flowers are much larger, completely double and appear all through the summer. A real summer color bonanza. Pomegranate is hardy to almost zero; so bring indoors or protect outside accordingly.

Catalog No. NH 20 WINDMILL PALM

Palms are now much in vogue for summer outdoor tropical settings or indoor decoration. Here is one of the best. A small, slender fan palm with leaves forming a compact crown. Quite artistic. The hardiest of palms, too, enduring temperatures to 5° above. Equally choice in the tropical outdoor setting or indoors.

Catalog No. NH 21 New Zealand TREE FERN

A beautiful thing, its slender graceful stem crowned by the spreading, long, light green fronds will reach majestic proportions of several feet as a tub plant. Stately in the tropical setting but must be used indoors as a pot specimen over winter as it is tender below 32°.

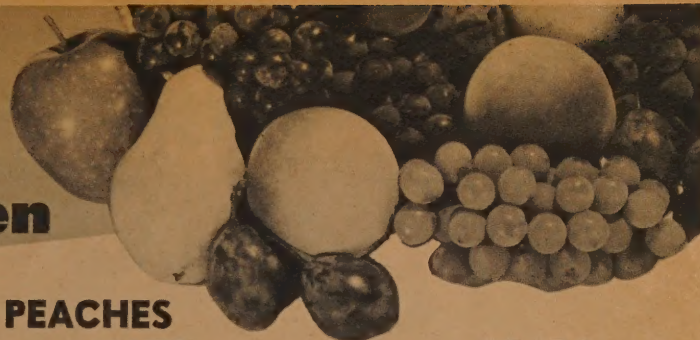

Catalog No. NH 9 Bougainvillea "SCARLET O'HARA"

No one who has seen the cascading masses of large, brilliant red flowers of this plant in California has not fallen in love with it. Grows with great vigor and blooms early. Will take 15°; so bring indoors over winter or heavily protect out-doors.

Your choice, alike or assorted

Catalog No. B 22 **\$1.69**

12 top-size flowering bulbs

Hardy EVERGREEN AZALEAS

Budded, ready to break into Bloom

Here are prize-winning azalea varieties that are hardy in mid-America weather. Azaleas thrive in an acid soil, rich in organic matter such as peat moss or leaf mold. They like abundant moisture but good drainage; they like a raised planting bed which is at least 50% acid peat moss or leaf mold. Azaleas will grow in sun or shade, but a protected semi-shady spot away from the hot afternoon sun is best. Mulch rather than cultivate with rake or hoe as roots feed at the surface. One handful of cottonseed meal or similar azalea food applied in early spring is rewarding.

Azalea HINO-CRIMSON

The best of the red-flowering types. Flaming crimson flowers completely smother the evergreen foliage in mid-spring. Dwarf and compact growing and as hardy as they come.

Catalog No. ER 18

Azalea SNOW

A perfect counterpart to HINO-CRIMSON. The double blooms, white as driven snow, are equally abundant. A splendid hardy dwarf type.

Catalog No. ER 1R

Azalea GABLE'S ROSEBUD

The premier achievement of that famous azalea hybridizer, Joe Gable of Pennsylvania. Lovely pink flowers are so double they appear as miniature roses and smother the plant at Mother's Day. As dwarf and compact as Hino-Crimson or Snow, it is completely hardy and will take temperatures to 20 below.

Plantland's FERTO-MULCH

A peat-woods fiber mulch plus plant food for mulching all plantings, including rose beds, evergreens, broadleaf evergreens, azaleas and rhododendrons, flower beds, strawberries and other fruit plants, trees and shrubs. FERTO-MULCH is specifically designed as a top dressing after planting, or for mulching established plantings. Apply to a depth of at least two inches—a 4-inch depth is better. Cover bed or planting location beyond root spread for best results. FERTO-MULCH PROVIDES AN INSULATING BLANKET TO PROTECT ROOTS FROM TEMPERATURE EXTREMES. IT CONSERVES MOISTURE AND ENABLES THE SOIL TO BREATHE. IT ELIMINATES OR REDUCES THE WEEDING PROBLEM. The plant food content of FERTO-MULCH slowly leaches into the soil, providing a long-lasting non-burning fertilizing benefit. The plant food includes Nitrate, Ammonium, Dolomite, and Super-phosphate in a balanced formulation with the organic portions of FERTO-MULCH. The dark color of FERTO-MULCH warms the soil in early spring, encouraging growth. It also provides a most pleasing contrast with the plantings and lawn—ideal for "dressing up" the planting.

Grass Seed That Grows!

Things happen when you plant F.K.'s grass seed. You get a fine turf—fast. You buy in bulk and save money.

Here are two lawn mixtures for folks who want results—

PLAYGROUND MIX

We have harvested FROM OUR OWN FARM of a bountiful crop of Kentucky Fescue. This grass has withstood torments of the drouth years and the hardest kind of usage. We blend our Kentucky 31 with smaller amounts of nurse grasses and White Clover to make the sturdiest, hardest wearing lawn ever. PLANTLAND'S PLAYGROUND is ideal for rough, tough use. Sow it where romping children prevent usual grasses from growing—or on slopes in service areas and elsewhere you cannot maintain a turf. Because of our bountiful seed crop we are offering PLANTLAND'S PLAYGROUND at these low prices.

Plantland's "QUICK LAWN"

Excellent blend where quick turf effect is important. Kentucky Blue with Perennial and Common Rye Grass, Meadow Fescue, Red Top and White Clover. 5 Lbs. \$3.79
Catalog No. A4

DID YOU KNOW? That Sequoia (the giant redwoods) was named after a Cherokee Indian, Sequoyah. That the spines of barberries are really the leaves. That all North American azaleas are deciduous and all North American rhododendrons are evergreen.

WHEN ORDERING ALWAYS ADD RA-PID-GRO

For Sure Transplanting—Faster Growth—Better Production
RA-PID-GRO is a highly concentrated, secret formula, complete plant food which is mixed with water to make it immediately available to the plant.

In transplanting, simply put 4 teaspoons of RA-PID-GRO in one gallon of water. Soak the roots of plants as follows: Roses, Shrubs and Vines, 3 minutes; Trees, 4 minutes; Raspberries, Blackberries, Grapes, 1 minute; Strawberries, a second or two. Plant immediately after removing from dip. This will encourage rapid development of root system.

After planting, pour the remaining solution around the newly-planted stock, including all pot-grown plants as well. Use RA-PID-GRO every two or three weeks through the growing season, according to instructions on the package, and watch your plantings flourish! All the vital elements necessary for strong growth and good production are present in RA-PID-GRO, and are instantly available to the plant.

One pound of RA-PID-GRO makes 22 gallons

COMPLETE SATISFACTION GUARANTEED

We guarantee high quality stock, exactly as represented, government inspected, and to be in a healthy live growing condition. Any plants that are otherwise will be replaced free.

Replacements—We guarantee our plants to grow, bloom and produce if given intelligent handling, proper planting and reasonable care. Weather conditions, carelessness and lack of experience by the planter are conditions beyond our control; regardless of this, FORREST KEELING NURSERY will replace any plants that fail to grow at one-half the original purchase price if notified six months after date of purchase. Enter claims immediately. It is mutually agreed that our liability cannot be greater than purchase price. GUARANTEED SATISFACTION.

Plantland's 24th Anniversary

\$ SAVING SPECIALS

SILVER-GREEN PFITZER

One of our finest spreading evergreens. Bluish-silver cast gives splendid color contrast with other evergreens. Hardy as nails; strong and vigorous in growth. Thrives in full sun.

THE NEW BLAZE

The old Blaze Rose was the greatest climber ever developed. Now with this new strain you get a more ever-blooming type with brilliant, double-rose 2-3 in. cupped flowers in June, July, August and September. Each succeeding year increases quantity of summer flowering as canes of old wood are produced. Plant on trellis, arbor or put a row along your fence. Or achieve a fountain display by growing on a 5-ft. stake. A vigorous grower—space 8 ft. apart.

Our best northern-grown plants

Catalog No. R 1C

COLORADO BLUE SPRUCE

You get 10-12 in., 6 yr. old, twice-transplanted, bushy little trees that will develop into priceless specimens. Our customers who purchased trees of this size just a few years ago now report garden prizes they wouldn't part with for many times purchase price. Plant in full sun and mulch with manure, leaf mold or nitrogen-rich Plantland Peat to bring out color.

This item is always a sell-out. Place your order early.

BIRD OF PARADISE

(Strelitzia reginae)

A florist masterpiece you can grow in your own home. As easy to grow as a geranium or philodendron. Fascinating flowers 3 to 5 in. long break out in jungle hues of orange, blue, yellow, red. Flowers resemble the Bird of Paradise. Plant starts blooming when it has 9 leaves. Mature plants have two dozen or more flowers at a time and bloom much of the year.

3" Pot Plants.

Catalog No. NH 4

CHINESE EVERGREEN HEDGE

(Ligustrum sinense)

Makes Complete Hedge in Six Months!

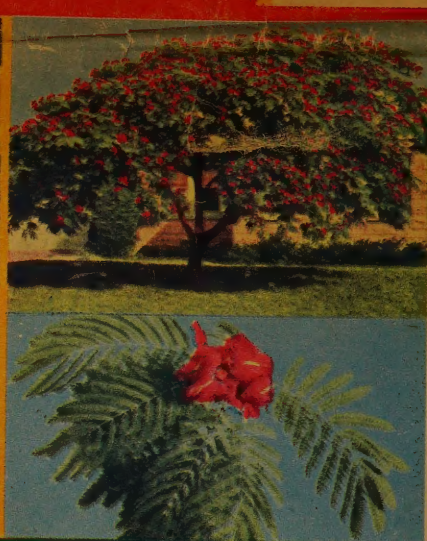

Imagine, you can have a developed evergreen hedge this year. Fine, lacy foliage grows dense and luxuriant to make emerald living wall. Easily trimmed to any height desired from one foot up to 4, 5 or even 6 ft. Formal and neat even when not pruned! Acclaimed most graceful and handsome of privets. Untrimmed plants bear large bouquets of showy flowers in mid-summer. Long-lived. One clipped hedge has been maintained at less than 4 feet tall for a century.

Our plants are a hardy strain and parent stock have endured temperatures to 12 degrees below zero. Plants remain evergreen except in coldest winters when some leaf-drop may occur. For a quick-developing hedge of permanent beauty, it is unrivaled.

We send our sturdy nursery-grown plants 12-18 in. tall

25 ft. hedge (25 plants) **\$2.45** 50 ft. hedge (50 plants) **\$5.00** 100 ft. hedge (100 plants) **\$9.75**

Catalog No. H 2

NORTHERN MIMOSA or SILK TREE

(Albizia)

Spectacular summer-long bloomer with flamboyant rosy, silky flowers unlike anything you have seen. Fine, airy foliage and sea-green branches lend tropical effect. Extremely rapid in growth, making a show-piece in just a season or two.

Our plants are propagated from the utterly lovely Mimosa growing here in Elsberry in the yard of Mrs. Hurley Crank, our former office manager. This choice specimen not only has fine rose-colored bloom for long summer weeks but has proven far harder than common Mimosa. No one who has seen this tree in bloom can resist having one of the "daughters."
